WARNING: Maximum allowable turbocharger speed is 214.9krpm. The use of this product above max turbocharger speed is at the owner's risk, and can result in damage and premature failure. To protect the turbocharger from overspeed when operating, a speed sensor should be installed into the compressor housing to monitor shaft speed. Sensors sold separately.

IMPORTANT: The horsepower numbers presented are calculated based strictly on choke flow of the compressor map (total turbo capability), which represents the potential flywheel horsepower.

Performance results of this product are highly dependent upon your vehicle's modifications and tuning/calibration.
